## SUMMARY

Software Engineer with 4 years of experience building **secure, scalable web & mobile applications**. Adept at **Java and JavaScript frameworks**, delivering user-centric, testable, and maintainable solutions in Agile environments. Recognized for improving API performance, fostering collaboration, and ensuring compliance with enterprise standards. Guided by an “Ever Positive, Never Negative” & give-back attitude.

## PROFESSIONAL EXPERIENCE

### Software Engineer

TD Bank

Toronto, ON

May 2024 - Present

- Developed a **full-stack React–Express–Python Web App** that automated job-schedule reporting & verification and reduced manual effort by **30%**.
- Led the **end-to-end development of the application** - from UI/UX design to backend API development.
- Designed a **modern React UI**, built reusable components, and optimized client-side performance.
- Built scalable Express.js **APIs** & Python services to process form submissions & automate backend workflows.
- Integrated **backend** with **Python** & Zowe CLI services to process user input on host.
- Designed backend integrations to retrieve job data, abstracting legacy systems behind clean APIs.
- Added **real-time job submission and completion tracking**, providing visibility into job execution status.
- Collaborating with cross-functional teams to **resolve high-priority incidents**, ensuring minimal downtime.
- Enhanced performance & application reliability by participating in **design reviews**.
- Collaborated in an **Agile environment**, contributing to a **25% reduction** in cycle time.
- Led daily huddle meetings, co-hosted fireside chats, **presented Pod’s plan & achievements in PI Planning**.
- Created **clear technical documentation** to **transfer knowledge** across the product group.

### Software Developer

TD Bank

Toronto, ON

Sept 2022 - May 2024

- Delivered high-priority tasks under tight deadlines, **collaborating with business teams** to meet user needs.
- Wrote production-ready code and **optimized queries for data mining**.
- **Automated workflows using Power Automate**, reducing manual effort by 10%.
- Mentored new team members, promoting teamwork and collaboration in a multidisciplinary environment.
- Contributed to development tasks across multiple projects and assisted with high-priority production issues.
- Created clear and concise system documentation, including business **process models, flow diagrams**.
- Delivered **presentations about networking & technologies used at the bank** during co-op events.

## SKILLS

|                                   |                                                                                                                                                                   |
|-----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Programming Languages:</b>     | Advanced Java, JavaScript, TypeScript, Python, SQL, PL/SQL, HTML, CSS, SwiftUI, C++ , BASH Shell Scripting, YAML                                                  |
| <b>Frameworks:</b>                | Spring, Spring boot, Hibernate, WebFlux, React, Node, Angular, Redux                                                                                              |
| <b>Databases:</b>                 | MongoDB, Redis, IMS DB, DB2                                                                                                                                       |
| <b>Mobile App:</b>                | Android, iOS, WatchOS                                                                                                                                             |
| <b>Cloud &amp; DevOps:</b>        | Azure, AWS, GCP, Docker, Git, GitHub, Maven, CI/CD (Azure DevOps, GitHub Actions), PowerShell, Postman,                                                           |
| <b>APIs:</b>                      | RESTful APIs - JSON, XML, Authentication - JWT, OAuth, SAML, SASL, Zowe CLI                                                                                       |
| <b>Messaging &amp; Streaming:</b> | Apache Kafka - Producers, Consumers, Topics, Partitions, Brokers, Clusters, Kafka Connect, Kafka Streams, Consumer Groups, Schema Registry, KSQL, Confluent Cloud |
| <b>Tools:</b>                     | Jira, Service Now, Confluence, Figma, Power Platforms                                                                                                             |
| <b>Testing:</b>                   | Jest, Mocha, Supertest, Unit, System, Integration, Regression, Performance Testing                                                                                |
| <b>IDEs:</b>                      | Visual Studio Code, WebStorm, Visual Studio, IntelliJ, Eclipse, Xcode, Android Studio                                                                             |
| <b>Others:</b>                    | SDLC & Agile Experience, UI/UX Design, Networking, Game Content Creation                                                                                          |
| <b>Mainframe:</b>                 | COBOL, JCL, SAS, TSO, ISPF, CA-7, AWF, Endeavor, z/OS Connect, IDz                                                                                                |
| <b>Soft Skills:</b>               | Team work & Collaboration, Problem-Solving, Clear Communication, Technical & Business Writing, Self-starter, Outcome-Driven, French Language (Beginner)           |

---

PROJECTS

---

**Chronicle – Travel Journal App****Jan - April 2024**

- Chronicle **helps users store, relive, and cherish travel memories** that fade and get lost in storage drives.
- Built with **React, Next.js, TypeScript, Tailwind CSS, Node.js, Express, MongoDB**, Mongoose, Cyclic.sh.
- Designed and **implemented CRUD APIs for journals, forums**, authentication features and more.
- Optimized journal **update, delete, search feature with MongoDB indexing**, reducing query time by 40%.
- **Integrated location tagging** in journals by interactive maps, using Leaflet.js & Google Places Autocomplete.
- **Enabled social sharing**, allowing users to share journals with friends & view their friends' entries in feed.
- Implemented a **forum feature for users to communicate**, plan meet-ups, and discover new places.
- Integrated Dropbox API for multimedia storage, reducing database load, improving retrieval speed by 30%.
- Developed secure **authentication & password management using Passport.js, Bcrypt, & JWT**.
- Deployed **auto-scaling backend** on Cyclic.sh, ensuring 99.9% uptime & seamless high-traffic performance.

**Fragments - Data Management Microservice****Sept - Dec 2023**

- Built a **production-ready microservice using Node.js, Express, and AWS** to manage text and image data.
- Implemented secure user authentication and **role-based access control with AWS Cognito**.
- **Optimized data storage** and retrieval using **AWS S3 and DynamoDB**, reducing data query time by 40%.
- **Containerized both backend & UI** with Docker, enabling smooth **deployment to AWS EC2** for production.
- Automated CI/CD pipelines with **GitHub Actions**, ensuring seamless deployment.
- Deployed on AWS ECS for container orchestration & auto-scaling, ensuring 99.99% uptime in heavy traffic.
- Applied **AWS CloudFormation for Infrastructure as Code**, enabling consistent infrastructure setup.
- Integrated **AWS CloudWatch for real-time logging, monitoring, and performance tracking**, providing instant error alerts and improving issue resolution time by 30%.

**Harmony With Heart - Community and Event Management App****Present - Live on PlayStore/AppStore**

- App developer for Yogi Divine Society Canada's official app, enabling community engagement, event discovery, registration, and efficient event management, including food service planning and guest hosting.
- Developed & maintained scalable **RESTful APIs using Node.js, TypeScript, Express.js to deploy on AWS**.
- Designing **schemas** by collaborating with business stakeholders to align features with organizational needs.
- Implemented **authentication and authorization using JWT, OAuth**.
- Implemented multi-step user registration with **role-based access control** for admins, volunteers, attendees.
- Wrote **tests with Jest, Mocha, and Supertest**, achieving 85% coverage & reducing production bugs by 20%.
- Automated deployments through CI/CD via **AWS CodePipeline**, monitoring logs via **Amazon CloudWatch**.
- Collaborated closely with QEs for seamless integration of new features, accelerating the delivery rate.

---

EDUCATION

---

**Computer Programming and Analysis (Co-op) - High Honors****May 2021 - April 2024**

Advanced Diploma, Seneca Polytechnic, Toronto

CGPA: 4.0 / 4.0

- Awards: **President's Honor list** (a term GPA of 4.0/4.0)

**Summer 2021, Summer 2023, Fall 2023**

---

ACHIEVEMENTS/CERTIFICATIONS

---

**2024 Housing Hackathon Finalist:****March 2024**

Developed a website to promote ADUs for affordable housing in the GTA, leading my team to the finals thrice.

**2023 Smart Cities Hackathon Finalist:****May 2023**

Led a team to design a swipe-based app for international students' accommodation in Canada

**2022 Sustainability Hackathon Category Winner:****March 2022**

Developed an app prototype to combat gambling addiction, won the challenge category and presented in finale.

**C/C++ & Data Structures -** **May 2023****The Full-Stack Web Development Bootcamp -** **March 2025****SQL Advanced Certification -** **HackerRank****5-Star Silver Badge C++ Coder -** **HackerRank****Apache Kafka for Beginners Certificate -** **April 2025**
